

Instructions on how to run a program on Ubuntu:

1. Click on Dash Home button  on top of the launcher (toolbar)
2. Type in the program you want to run, such as xawtv, terminal, or system monitor

3. Double click on the program and run it
4. Now the program icon will show up on the launcher, right click on it and choose **Keep in launcher**, so next time when you login the computer, the program will stay in the launcher, you will not need to search the program again.
